9. Summary of Valuation Report and Fairness Opinion:

- a) Summary of Valuation Report dated 16th May, 2024 issued as by Mr. Ajay Kumar Siwach – Registered Valuer and Fairness Opinion each dated 17th May, 2024 as issued by SEBI Registered Category-I, Merchant Banker namely 3Dimension Capital Services Limited and Ekadrisht Capital Private limited. Share Exchange Ratio is as under –
“Ind Swift Laboratories Limited” (Transferee Company) shall issue and allot 15 (Fifteen) Equity shares of Face value of INR 10.00/- (Rupees Ten Each) each to Equity shareholders of “Ind Swift Limited” (Transferor Company) for every 100 (One Hundred) Equity Shares of Face value of INR 2/- (Rupees Two Each) each held by them in the Transferor Company.

- a) Basis of Valuation and Fairness Opinion:

For the Transferor Company - Since the Transferor Company will transfer its business to the Transferee Company through the Scheme and will not continue its business operations, the valuer deemed it appropriate to assign Nil weightage to the Discounted Free Cash Flow (DFCF) Method. Additionally, the value derived from the DFCF Method does not align with the value determined by the Market Price Method. Therefore, the valuer found it suitable to allocate 100% weightage to the Market Price Method.

For the Transferee Company - The valuer considered that the Transferee Company currently has no business operations but possesses Non-Current Investments and Cash Balances in its Assets Portfolio. Consequently, an 80% weightage was assigned to the Net Assets Value Method and 20% weightage to the Market Price Method.

Further, refer the Valuation Report and Fairness Opinions annexed with this Notice, for the complete details including the basis of valuation, methodologies adopted, share exchange ratio etc.

13. The Rationale and Benefit of the Scheme:

(i) This Scheme of Amalgamation would result, inter-alia, in the following synergies for both the Transferor and Transferee companies and thereby preserving and creating value for its shareholders, creditors and various other stakeholders:

• **Expansion into the Formulation Business:**

The Transferee Company had been engaged in the API business and recently exited the API business. It intends to focus and grow the formulations business which offers significant potential and growth opportunities going forward. To establish its presence in the formulations business, it has already made certain investments in two joint ventures. Since the Transferor company is engaged in Formulations business for a while and has already build capacity for the same, the Proposed Amalgamation would augment and spearhead this strategic shift of the Transferee Company into formulations business inorganically by combining the present formulations business of the Transferor Company along with access to its resources and expertise, enabling a more comprehensive and competitive player in the pharmaceutical formulations market.

- **Takeover / Discharge of the debt of the Transferor Company and thereby relieve it from financial stress:**

The Transferor Company has been under severe financial stress and has been facing challenges in discharging its debt obligations, with a significant lump-sum payment due in March 2024. The Transferor Company has in the past made numerous efforts to raise funds to fulfil its debt repayment obligations without much success and thereby pushing the Transferor company to brink of an IBC process which may lead to disintegration of the promising formulation business and various stakeholders losing their value.

The Proposed Amalgamation will offer a bail out to the Transferor company from its debt obligation by providing the necessary funds to discharge its debt and ensure continuity of its formulation business and preservation of shareholder value, alleviating creditors/ lenders pressure and ensuring a stronger / debt free merged entity ready for the long haul.

Note: The significant lump sum payment as stated above was due to Edelweiss Asset Reconstruction Company in March 2024, the transferee company has already taken over this debt of the Edelweiss Asset Reconstruction Company and restructured the same to the benefits & interest of all the stakeholders.

- **Value creation for Shareholders:**

The Proposed Amalgamation is expected to contribute to economic value creation for both Transferor and Transferee companies. The shareholders of Transferor company will benefit from reduced finance costs, improved profitability and additional resources to fund the growth of formulations business. The shareholders of the Transferee company are expected to benefit from growth in the formulations business. Shareholders of both Company are also likely to benefit from the increased value created through business synergies, cost savings, reduction in administrative / operating costs and improved financial performance of the merged entity.

- **Simplification of Group structure:**

The Proposed Amalgamation would lead to simplification of the Group structure by reducing one listed company, and thereby eliminating inefficiency and cash trap on distribution of profits to shareholders in future. This will also lead to reduction of higher compliance/ reporting burden and administrative cost by reduction of one listed company. All of this will result in higher operational efficiencies and maximize value for the shareholders of both the companies.

- **Focused management, synergies, and Growth prospects:**

The Proposed Amalgamation would not only create economies of scale but also simplify management and strategic focus, leading to a better long-term performance. The Amalgamation will facilitate better and more efficient control over the business and financial conduct of the merged company allowing a more streamlined and coordinated approach to governance and strategic decision-making.

The combined entity, on the back of its financial stability is likely to attract more opportunities for organic and inorganic growth viz., partnerships, acquisitions, and market expansion, translating into enhanced financial prospects.

In summary, the amalgamation of the Transferor Company with the Transferee Company is driven by strategic business objectives of preserving businesses of both companies, build strong foundation and achieve market competitiveness by combing the collective strength of both the companies, achieving business and operational synergies & efficiencies, improved financial stability and performance, and thereby preserving and creating long-term value for its various stakeholders.

- (ii) Due to the aforesaid reasons, it is considered desirable and expedient to amalgamate all the companies in accordance with this Scheme, pursuant to Section 230 – 232 of the Companies Act, 2013.

C. RATIONALE FOR THE SCHEME OF ARRANGEMENT

This Scheme of Amalgamation would result, inter-alia, in the following synergies for both the Transferor and Transferee companies and thereby preserving and creating value for its shareholders, creditors and various other stakeholders:

- **Expansion into the Formulation Business:**

The Transferee Company had been engaged in the API business and recently exited the API business. It intends to focus and grow the formulations business which offers significant potential and growth opportunities going forward. To establish its presence in the formulations business, it has already made certain investments in two joint ventures. Since the Transferor company is engaged in Formulations business for a while and has already build capacity for the same, the Proposed Amalgamation would augment and spearhead this strategic shift of the Transferee Company into formulations business inorganically by combining the present formulations business of the Transferor Company along with access to its resources and expertise, enabling a more comprehensive and competitive player in the pharmaceutical formulations market.

- **Takeover / Discharge of the debt of the Transferor Company and thereby relieve it from financial stress:**

The Transferor Company has been under severe financial stress and has been facing challenges in discharging its debt obligations, with a significant lump-sum payment due in March 2024. The Transferor Company has in the past made numerous efforts to raise funds to fulfil its debt repayment obligations without much success and thereby pushing the Transferor company to brink of an IBC process which may lead to disintegration of the promising formulation business and various stakeholders losing their value.

The Proposed Amalgamation will offer a bail out to the Transferor company from its debt obligation by providing the necessary funds to discharge its debt and ensure continuity of its formulation business and preservation of shareholder value, alleviating creditors/ lenders pressure and ensuring a stronger / debt free merged entity ready for the long haul.

- **Value creation for Shareholders:**

The Proposed Amalgamation is expected to contribute to economic value creation for both Transferor and Transferee companies. The shareholders of Transferor company will benefit from reduced finance costs, improved profitability and additional resources to fund the growth of formulations business. The shareholders of the Transferee company are expected to benefit from growth in the formulations business. Shareholders of both Company are also likely to benefit from the increased value created through business synergies, cost savings, reduction in administrative / operating costs and improved financial performance of the merged entity.

- **Simplification of Group structure:**

The Proposed Amalgamation would lead to simplification of the Group structure by reducing one listed company, and thereby eliminating inefficiency and cash trap on distribution of profits to shareholders in future. This will also lead to reduction of higher compliance/ reporting burden and administrative cost by reduction of one listed company. All of this will result in higher operational efficiencies and maximize value for the shareholders of both the companies.

- **Focused management, synergies, and Growth prospects:**

The Proposed Amalgamation would not only create economies of scale but also simplify management and strategic focus, leading to a better long-term performance. The Amalgamation will facilitate better and more efficient control over the business and financial conduct of the merged company allowing a more streamlined and coordinated approach to governance and strategic decision-making.

The combined entity, on the back of its financial stability is likely to attract more opportunities for organic and inorganic growth viz., partnerships, acquisitions, and market expansion, translating into enhanced financial prospects.

In summary, the amalgamation of the Transferor Company with the Transferee Company is driven by strategic business objectives of preserving businesses of both companies, build strong foundation and achieve market competitiveness by combing the collective strength of both the companies, achieving business and operational synergies & efficiencies, improved financial

stability and performance, and thereby preserving and creating long-term value for its various stakeholders.

This comprehensive rationale as above underscores the strategic motivations, expected benefits, and the context surrounding the Proposed Amalgamation, highlighting its alignment with both the companies' objectives and the interests of their various stakeholders.

- D. Due to the aforesaid reasons, it is considered desirable and expedient to amalgamate the Transferor Company with Transferee Company in accordance with this Scheme, pursuant to Section 230 – 232 of the Companies Act, 2013.
- E. The amalgamation of the Transferor Company with the Transferee Company, pursuant to and in accordance with this Scheme, under Section 230 - 232 and other relevant provisions of the Companies Act, 2013 and applicable Rules of Companies (Compromises, Arrangements Amalgamations) Rules, 2016, subject to sanction of Hon'ble National Company Law Tribunal (NCLT) of relevant jurisdiction, shall take place with effect from the Appointed Date and shall be in compliance with Section 2(1B) of the Income Tax Act, 1961.

1. OBJECTIVES AND RATIONALE OF THE SCHEME:

The amalgamation of Transferor Company with Transferee Company will create a synergy benefit wherein Transferee Company will get working business undertaking and combined business will get exposure of good working capital. The Transferor Company and Transferee Company belongs to same group i.e., Ind-swift group. The Board of Directors of Transferor Company and the Transferee Company believe that the amalgamation of Transferor Company with Transferee Company is expected to enable better realization of potential of business, better exposure of working capital, easy repayment of the debt of the Transferor Company. It would enable enhanced value creation for the companies involved in Scheme, their respective Shareholders and Creditors.

This Scheme of Amalgamation would result, inter-alia, in the following benefits:

- **Expansion into the Formulation Business:**
The Transferee Company had been engaged in the API business and recently exited the API business. It intends to focus and grow the formulations business which offers significant potential and growth opportunities going forward. To establish its presence in the formulations business, it has already made certain investments in two joint ventures. Since the Transferor company is engaged in Formulations business for a while and has already build capacity for the same, the Proposed Amalgamation would

augment and spearhead this strategic shift of the Transferee Company into formulations business inorganically by combining the present formulations business of the Transferor Company along with access to its resources and expertise, enabling a more comprehensive and competitive player in the pharmaceutical formulations market.

- **Takeover / Discharge of the debt of the Transferor Company and thereby relieve it from financial stress:**

The Transferor Company has been under severe financial stress and has been facing challenges in discharging its debt obligations, with a significant lump-sum payment due in March 2024. The Transferor Company has in the past made numerous efforts to raise funds to fulfil its debt repayment obligations without much success and thereby pushing the Transferor company to brink of an IBC process which may lead to disintegration of the promising formulation business and various stakeholders losing their value.

The Proposed Amalgamation will offer a bail out to the Transferor company from its debt obligation by providing the necessary funds to discharge its debt and ensure continuity of its formulation business and preservation of shareholder value, alleviating creditors/ lenders pressure and ensuring a stronger / debt free merged entity ready for the long haul.

- **Value creation for Shareholders:**

The Proposed Amalgamation is expected to contribute to economic value creation for both Transferor and Transferee companies. The shareholders of Transferor company will benefit from reduced finance costs, improved profitability and additional resources to fund the growth of formulations business. The shareholders of the Transferee company are expected to benefit from growth in the formulations business. Shareholders of both Company are also likely to benefit from the increased value created through business synergies, cost savings, reduction in administrative / operating costs and improved financial performance of the merged entity.

- **Simplification of Group structure:**

The Proposed Amalgamation would lead to simplification of the Group structure by reducing one listed company, and thereby eliminating inefficiency and cash trap on distribution of profits to shareholders in future. This will also lead to reduction of higher compliance/ reporting burden and administrative cost by reduction of one listed company. All of this will result in higher operational efficiencies and maximize value for the shareholders of both the companies.

- **Focused management, synergies, and Growth prospects:**

The Proposed Amalgamation would not only create economies of scale but also simplify management and strategic focus, leading to a better long-term performance. The Amalgamation will facilitate better and more efficient control over the business and financial conduct of the merged company allowing a more streamlined and coordinated approach to governance and strategic decision-making.

The combined entity, on the back of its financial stability is likely to attract more opportunities for organic and inorganic growth viz., partnerships, acquisitions, and market expansion, translating into enhanced financial prospects.

In summary, the amalgamation of the Transferor Company with the Transferee Company is driven by strategic business objectives of preserving businesses of both companies, build strong foundation and achieve market competitiveness by combing the collective strength of both the companies, achieving business and operational synergies & efficiencies, improved financial stability and performance, and thereby preserving and creating long-term value for its various stakeholders.

SECTION III - METHODS OF VALUATION ADOPTED

In case of a valuation for Amalgamation, the emphasis is on arriving at the “relative” values of the shares of the merging companies to facilitate determination of the “share exchange ratio”. Hence, the purpose is not to arrive at absolute values of the shares of the companies.

Judicial Pronouncements: -

Hindustan lever Employees’ Union v/s Hindustan lever Limited and others (1995) 83 Company cases 30 (SC)

The jurisdiction of the Court in sanctioning a claim of merger is not to ascertain mathematical accuracy if the determination satisfied the arithmetical test. A company court does not exercise an appellate jurisdiction. It exercises a jurisdiction founded on fairness. It is not required to interfere only because the figure arrived at by the valuer was not as good as it would have been if another method had been adopted. What is imperative is that such determination should not have been contrary to law and that it was not unfair for the shareholders of the company which was being merged.

The Hon’ble Supreme Court held “We do not think that the internal management, business activity or institutional operation of public bodies can be subjected to inspection by the court. To do so, is incompetent and improper and, therefore, out of bounds.”

The **dominance of profits for valuation of share was emphasized in “McCathies case”** (Taxation, 69 CLR 1) where it was said that “*the real value of shares in a company will depend more on the profits which the company has been making and should be capable of making, having regard to the nature of its business, than upon the amount which the shares would realize on liquidation*”. This was also re-iterated by the Indian Courts in Commissioner of Wealth Tax v. **Mahadeo Jalan’s case (S.C.)** (86 ITR 621) and Additional Commissioner of Gift Tax v. Kusumben D. Mahadevia (S.C.) (122 ITR 38).

In the ultimate analysis, valuation will have to involve the exercise of judicious discretion and judgment considering all the relevant factors. There will always be several factors, e.g., present, and prospective competition, yield on comparable securities, and market sentiments etc. which are not evident from the face of the balance sheets but which will strongly influence the worth of a share.

Based on the facts of the case, I have valued **Ind Swift Limited (Transferor Company/ “ISL”)** and **Ind Swift Laboratories Limited (“Transferee Company”/ “ISLL”)** as per Internationally Accepted Valuation Methodologies.

SECTION – IV VALUATION ANALYSIS

There are three approaches to Valuation namely Income, Asset and Market Approaches.

Approach	Valuation Methodologies	Basis of Consideration
Asset	Adjusted Net Asset Value (NAV) Method	<p>The Asset-based method views the business as a set of assets and liabilities that are used as building blocks of a business value. The business value is the difference in the value of these assets and liabilities on a Book Value basis or Realizable Value basis or Replacement Cost basis.</p> <p>In the case of transferee Company, I have deemed it suitable to apply NAV as the Company has a huge quantum of Investment assets and this method involves identifying and valuing a company's assets which is quite objective and reliable as the company has stable and predictable asset values.</p> <p>However, in the case of the Transferor Company, the company is engaged in Manufacturing and there are no significant investment assets done by the Company along with that the Book Value of the Company is in negative, hence, I deemed it suitable to avoid Adjusted Net Asset Value (NAV) Method.</p>
Market	Comparable Companies Multiples (CCM) Method	<p>This methodology uses the valuation ratio of a publicly traded company and applies that ratio to the company being valued. The valuation ratio typically expresses the valuation as a function of a measure of financial performance or Book Value (e.g., Revenue, EBITDA, EBIT, Earnings per Share or Book Value). A key benefit of Comparable Company Market Multiple analysis is that the methodology is based on the current market stock price. The current stock price is generally viewed as one of the best valuation metrics because it is based on observable inputs.</p> <p>In the instant case, both the companies are listed in the Stock Exchange and are frequently traded in the National Stock Exchange (NSE). Hence, I deemed it suitable to consider the Market Price in the NSE for the valuation exercise instead of the Comparable Multiples of the Transferor and Transferee Companies.</p>
	Market Price Method (90 Trading Days (TD) –10 Trading Days (TD))	<p>In this method the VWAP (Volume Weighted Average Price) of the latest 90 Trading days (TD) VWAP and 10 Trading days are taken. The maximum of these two is then taken as the fair market value.</p> <p>Since both the Companies are listed on the Stock Exchanges and are frequently traded on NSE, I have applied this methodology in this instant case for Transferor and Transferee Companies.</p>
Income	Discounted Free Cash Flow (DFCF) Method	<p>The DFCF method expresses the present value of the business as a function of its future cash earnings capacity. This methodology works on the premise that the value of a business is measured in terms of future cash flow streams, discounted to the present time at an appropriate discount rate. The value of the firm is arrived at by estimating the Free Cash Flows (FCF) to Firm and discounting the same with Weighted Average cost of capital (WACC). The DFCF methodology is the most appropriate basis for determining the earning capability of a business. In the DFCF approach, the appraiser estimates the cash flows of any business after all operating expenses, taxes, and necessary investments in working capital and Capex is being met.</p> <p>In case of Transferee Company, I have deemed it suitable to avoid DFCF Method as the Company has a huge quantum of Investment assets and this method involves valuing a company based on the future cash flows. However, the future cash flows from Investment Assets might not be accurate and reliable while computing the Company's worth.</p> <p>In case of the Transferor Company, having a business which is expected to be</p>

		continued in future years along with minimal Investment assets, hence I deemed it suitable to do valuation of the Company as per Discounted Free Cash Flow (DFCF) Method.

****Considered the fair value provided by the management.**

Note:

For the purpose of valuation of equity in this transaction through DFCF methodology, I have relied upon the projections provided by the management for the period starting from 01st April 2024 and ending 31st March 2031 duly supplemented by its Terminal Value based on the Gordon Growth Model and extrapolating the adjusted free cash flows for last year at an annual growth rate of 5% to perpetuity.

DFCF Assumptions:

Particulars		Notes
Risk free rate (Rf) as on 28.03.2024	7.05%	Considered of long-term India government bond rate
Market rate of return - ER(m)	15.24%	Considered the BSE Sensex for the determination of the Market Return.
Company Beta... (β)	0.28	I have taken the Beta value (B) as 0.28 since the Company's shares are listed, hence, I have taken the company's data to arrive to the beta.
Additional Company Specific (Including Small Company)	0%	I, have determined a 0% additional risk premium based on an assessment of the company's profile, financial structure, and return on investment (ROI). This evaluation considers the aggressiveness of projected future cash flows, the current national economic scenario, and the operating environment of the company.
Risk Premium (Unsystematic risk) (CSRP)		
Cost of Equity (Ke)	9.38%	As per Modified CAPM model i.e. $[K_e = R_f + \beta(R_m - R_f) + CSRP]$
Cost of Debt	9%	As represented by the Management & Financials of the Company
Equity portion in capital structure	77.42%	I have taken average of Debt-to-Equity ratio of suitable industry peers, as company's Debt to equity is not stable as its Total equity is negative.
WACC	8.78%	$WACC = (K_e * \% \text{ Equity in Capital Structure}) + (\text{Cost of Debt} * \% \text{ Debt in Capital Structure} * (1 - \text{Tax Rate}))$
Growth Rate	5%	As the perpetuity growth rate assumes that the company will continue its historic business and generate Free Cash Flows at a steady state forever. Since terminal value constitutes a major proportion of the entire value of the business, I while deciding the terminal growth rate have given emphasis to economic factors & financial factors like Inflation of the Country, GDP growth of the Country, Projected Financials, Historical Financial Position, Organic & Inorganic growth strategies of the Company etc. Accordingly, for perpetuity, I have considered 5% growth rate

As ISL will transfer its business to ISLL in the Amalgamation process and will not continue the business. I have considered to give Nil weightage to the DFCF. Further the Value as computed by DFCF Method does not comprehend the value as reached by the Market Price Method. Hence, I deemed it suitable to consider 100% weightage to the Market Price Method.

It intends to focus and grow the formulations business which offers significant potential and growth opportunities going forward. To establish its presence in the formulations business, it has already made certain investments in two joint ventures. Since the Transferor company is engaged in Formulations business for a while and has already build capacity for the same, the Proposed Amalgamation would augment and spearhead this strategic shift of the Transferee Company into formulations business inorganically by combining the present formulations business of the Transferor Company along with access to its resources and expertise, enabling a more comprehensive and competitive player in the pharmaceutical formulations market.

- **Takeover / Discharge of the debt of the Transferor Company and thereby relieve it from financial stress:**

This will also lead to reduction of higher compliance/ reporting burden and administrative cost by reduction of one listed company. All of this will result in higher operational efficiencies and maximize value for the shareholders of both the companies.

- **Focused management, synergies, and Growth prospects:**

The Proposed Amalgamation would not only create economies of scale but also simplify management and strategic focus, leading to a better long-term performance. SHARE EXCHANGE RATIO FOR AMALGAMATION

SHARE EXCHANGE RATIO FOR AMALGAMATION: -

BSE Circular No. LIST/COMP/02/2017-18 dated 29 May 2017 requires the valuation report for a Scheme of Arrangement to provide certain requisite information in a specified format.

Valuation Approach	Methodology Applied	Ind Swift Limited (Transferor)			Ind Swift Laboratories Limited (Transferee)		
		Weights	Equity Value Per Share (INR)	Weighted Equity Value Per Share (INR)	Weights	Equity Value Per Share (INR)	Weighted Equity Value Per Share (INR)
Asset	Adjusted Book Value	Nil	Nil	22.94	80%	166.41	155.91
Market	Comparable Companies Multiples	Nil	Nil		Nil	Nil	
	Market Price Method	100%	22.94		20%	113.90	
Income	Discounted Cash Flow	0%	11.89		Nil	Nil	

Based on above analysis, the share exchange ratio has been arrived at and accordingly the Transferee Company shall, without any further act or deed and without any further payment, issue and allot equity shares on a proportionate basis to each member of the Transferor Company whose names are recorded in the Register of Members/ List of Beneficial Owners for shares in dematerialized form of the Transferor Company on the Record Date.

Calculation Of Exchange Ratio		
Company Name	Ind Swift Laboratories Limited (Transferee Company)	Ind Swift Limited (Transferor Company)
Equity Value Per Share (INR)	155.91	22.94
Exchange Ratio	1.00	0.15
Exchange Ratio For 100 Shares	100	15

“Ind Swift Laboratories Limited” (Transferee Company) shall issue and allot 15 (Fifteen) Equity Shares of Face Value of INR 10.00/- (Rupees Ten Each) each to Equity Shareholders of “Ind Swift Limited” (Transferor Company) for every 100 (One Hundred) Equity Share of Face Value of INR 2/- (Rupees Two Each) each held by them in the Transferor Company.

Method of Valuation:

There are three approaches to Valuation namely Income, Asset, and Market Approaches.

Approach	Valuation Methodologies	Basis of Consideration
Asset	Adjusted Net Asset Value (NAV) Method	<p>The Asset-based method views the business as a set of assets and liabilities that are used as building blocks of a business value. The business value is the difference in the value of these assets and liabilities on a Book Value basis Realizable Value basis or Replacement Cost basis.</p> <p>In the case of a transferee Company, I have deemed it suitable to apply NAV as the Company has a huge quantum of Investment assets and this method involves identifying and valuing a company's assets which is quite objective and reliable as the company has stable and predictable asset values.</p> <p>However, in the case of the Transferor Company, the company has not made any significant investment in assets, along the Book Value of the Company is in negative, hence, we deemed it suitable to avoid the Adjusted Net Asset Value (NAV) Method.</p>
Market	Comparable Companies Multiples (CCM) Method	<p>This methodology uses the valuation ratio of a publicly traded company and applies that ratio to the company being valued. The valuation ratio typically expresses the valuation as a function of a measure of financial performance or Book Value (e.g., Revenue, EBITDA, EBIT, Earnings per Share or Book Value). A key benefit of Comparable Company Market Multiple analysis is that the methodology is based on the current market stock price. The current stock price is generally viewed as one of the best valuation metrics because it is based on observable inputs.</p> <p>In the instant case, both companies are listed on the Stock Exchange and are frequently traded in the National Stock Exchange (NSE). Hence, I deemed it suitable to consider the Market Price in the NSE for the valuation exercise instead of the Comparable Multiples of the Transferor and Transferee Companies.</p>
	Market Price Method (90 Trading Days (TD) –10 Trading Days (TD))	<p>In this method the VWAP (Volume Weighted Average Price) of the latest 90 Trading days (TD) VWAP and 10 Trading days are taken. The maximum of these two is then taken as the fair market value.</p> <p>Since both the Companies are listed on the Stock Exchanges and are frequently traded on NSE, I have applied this methodology in this instant case for Transferor and Transferee Companies.</p>
Income	Discounted Free Cash Flow (DFCF) Method	<p>The DFCF method expresses the present value of the business as a function of its future cash earnings capacity. This methodology works on the premise that the value of a business is measured in terms of future cash flow streams, discounted to the present time at an appropriate discount rate. The value of the firm is arrived at by estimating the Free Cash Flows (FCF) to Firm and discounting the same with Weighted Average cost of capital (WACC). The DFCF methodology is the most appropriate basis for determining the earning capability of a business. In the DFCF approach, the appraiser estimates the cash flows of any business after all operating expenses, taxes, and necessary investments in working capital and Capex is being met.</p> <p>In case of the Transferee Company, I have deemed it suitable to avoid DFCF Method as the Company has a huge quantum of Investment assets and this method involves valuing a company based on the future cash flows. However, the future cash flows from the Investment Asserts might not be accurate and reliable while computing the Company's worth.</p> <p>In case of the Transferor Company, having a business which is expected to be continued in future years along with minimal Investment assets, hence I deemed</p>

		it suitable to do valuation of the Company as per Discounted Free Cash Flow (DFCF) Method.

CONCLUSION & OPINION

In case of a valuation for Amalgamation, the emphasis is on arriving at the “relative” values of the shares of the merging companies to facilitate determination of the “share exchange ratio”. Hence, the purpose is not to arrive at absolute values of the shares of the companies.

Judicial Pronouncements: -

Hindustan lever Employees’ Union v/s Hindustan lever Limited and others (1995) 83 Company cases 30 (SC)

The jurisdiction of the Court in sanctioning a claim of merger is not to ascertain mathematical accuracy if the determination satisfied the arithmetical test. A company court does not exercise an appellate jurisdiction. It exercises a jurisdiction founded on fairness. It is not required to interfere only because the figure arrived at by the valuer was not as good as it would have been if another method had been adopted. What is imperative is that such determination should not have been contrary to law and that it was not unfair for the shareholders of the company which was being merged.

The Hon’ble Supreme Court held “I do not think that the internal management, business activity or institutional operation of public bodies can be subjected to inspection by the court. To do so, is incompetent and improper and, therefore, out of bounds.”

The **dominance of profits for valuation of share was emphasized in “McCathies case”** (Taxation, 69 CLR 1) where it was said that *“the real value of shares in a company will depend more on the profits which the company has been making and should be capable of making, having regard to the nature of its business, than upon the amount which the shares would realize on liquidation”*. This was also reiterated by the Indian Courts in Commissioner of Wealth Tax v. **MahadeoJalan’s case (S.C.)** (86 ITR 621) and Additional Commissioner of Gift Tax v. Kusumben D. Mahadevia (S.C.) (122 ITR 38).

In the ultimate analysis, valuation will have to involve the exercise of judicious discretion and judgment considering all the relevant factors. There will always be several factors, e.g., present, and prospective competition, yield on comparable securities, and market sentiments etc. which are not evident from the face of the balance sheets but which will strongly influence the worth of a share.

Based on the facts of the case, we have valued **Ind Swift Limited (Transferor Company/ “ISL”)** and **Ind Swift Laboratories Limited (“Transferee Company”/ “ISLL”)** as per the Internationally Accepted Methodologies.

“Subject to the above read with the caveats as detailed later, we as a Merchant Banker hereby certify that pursuant to SEBI Master Circular no. SEBI/HO/CFD/DIL1/CIR/P/2021/000000665 dated November 23, 2021, we have reviewed the proposed Scheme of Arrangement for Amalgamation, the Valuation Report dated 16th May 2024 of Mr. Ajay Kumar Siwach, Registered Valuer, with respect to the share exchange ratio aspects and consider it to be fair and reasonable from the point of view of equity shareholders of the Companies”.

SHARE EXCHANGE RATIO FOR AMALGAMATION

SHARE EXCHANGE RATIO FOR AMALGAMATION: -

BSE Circular No. LIST/COMP/02/2017-18 dated 29 May 2017 requires the valuation report for a Scheme of Arrangement to provide certain requisite information in a specified format.

Valuation Approach	Methodology Applied	Ind Swift Limited (Transferor)			Ind Swift Laboratories Limited (Transferee)		
		Weights	Equity Value Per Share (INR)	Weighted Equity Value Per Share (INR)	Weights	Equity Value Per Share (INR)	Weighted Equity Value Per Share (INR)
Asset	Adjusted Book Value	Nil	Nil	22.94	80%	166.41	155.91
Market	Comparable Companies Multiples	Nil	Nil		Nil	Nil	
	Market Price Method	100%	22.94		20%	113.90	
Income	Discounted Cash Flow	0%	11.89		Nil	Nil	

Based on above analysis, the share exchange ratio has been arrived at and accordingly the Transferee Company shall, without any further act or deed and without any further payment, issue and allot equity shares on a proportionate basis to each member of the Transferor Company whose names are recorded in the Register of Members/ List of Beneficial Owners for shares in dematerialized form of the Transferor Company on the Record Date.

Calculation Of Exchange Ratio		
Company Name	Ind Swift Laboratories Limited (Transferee Company)	Ind Swift Limited (Transferor Company)
Equity Value Per Share (INR)	155.91	22.94
Exchange Ratio	1.00	0.15
Exchange Ratio For 100 Shares	100	15

"Ind Swift Laboratories Limited" (Transferee Company) shall issue and allot 15 (Fifteen) Equity Shares of Face Value of INR 10.00/- (Rupees Ten Each) each to Equity Shareholders of "Ind Swift Limited" (Transferor Company) for every 100 (One Hundred) Equity Share of Face Value of INR 2/- (Rupees Two Each) each held by them in the Transferor Company.

**Method of Valuation:**

There are three approaches to Valuation namely Income, Asset, and Market Approaches.

Approach	Valuation Methodologies	Basis of Consideration
Asset	Adjusted Net Asset Value (NAV) Method	<p>The Asset-based method views the business as a set of assets and liabilities that are used as building blocks of a business value. The business value is the difference in the value of these assets and liabilities on a Book Value basis Realizable Value basis or Replacement Cost basis.</p> <p>In the case of a transferee Company, I have deemed it suitable to apply NAV as the Company has a huge quantum of Investment assets and this method involves identifying and valuing a company's assets which is quite objective and reliable as the company has stable and predictable asset values.</p> <p>However, in the case of the Transferor Company, the company has not made any significant investment in assets, along the Book Value of the Company is in negative, hence, we deemed it suitable to avoid the Adjusted Net Asset Value (NAV) Method.</p>
Market	Comparable Companies Multiples (CCM) Method	<p>This methodology uses the valuation ratio of a publicly traded company and applies that ratio to the company being valued. The valuation ratio typically expresses the valuation as a function of a measure of financial performance or Book Value (e.g., Revenue, EBITDA, EBIT, Earnings per Share or Book Value). A key benefit of Comparable Company Market Multiple analysis is that the methodology is based on the current market stock price. The current stock price is generally viewed as one of the best valuation metrics because it is based on observable inputs.</p> <p>In the instant case, both companies are listed on the Stock Exchange and are frequently traded in the National Stock Exchange (NSE). Hence, I deemed it suitable to consider the Market Price in the NSE for the valuation exercise instead of the Comparable Multiples of the Transferor and Transferee Companies.</p>
	Market Price Method (90 Trading Days (TD) –10 Trading Days (TD))	<p>In this method the VWAP (Volume Weighted Average Price) of the latest 90 Trading days (TD) VWAP and 10 Trading days are taken. The maximum of these two is then taken as the fair market value.</p> <p>Since both the Companies are listed on the Stock Exchanges and are frequently traded on NSE, I have applied this methodology in this instant case for Transferor and Transferee Companies.</p>
Income	Discounted Free Cash Flow (DFCF) Method	<p>The DFCF method expresses the present value of the business as a function of its future cash earnings capacity. This methodology works on the premise that the value of a business is measured in terms of future cash flow streams, discounted to the present time at an appropriate discount rate. The value of the firm is arrived at by estimating the Free Cash Flows (FCF) to Firm and discounting the same with Weighted Average cost of capital (WACC). The DFCF methodology is the most appropriate basis for determining the earning capability of a business. In the DFCF approach, the appraiser estimates the cash flows of any business after all operating expenses, taxes, and necessary investments in working capital and Capex is being met.</p> <p>In case of the Transferee Company, I have deemed it suitable to avoid DFCF Method as the Company has a huge quantum of Investment assets and this method involves valuing a company based on the future cash flows. However, the future cash flows from the Investment Assets might not be accurate and reliable while computing the Company's worth.</p> <p>In case of the Transferor Company, having a business which is expected to be continued in future years along with minimal Investment assets, hence I deemed it suitable to do valuation of the Company as per Discounted Free Cash Flow (DFCF) Method.</p>

CONCLUSION & OPINION

In case of a valuation for Amalgamation, the emphasis is on arriving at the "relative" values of the shares of the merging companies to facilitate determination of the "share exchange ratio". Hence, the purpose is not to arrive at absolute values of the shares of the companies.

Judicial Pronouncements: -

Hindustan lever Employees' Union v/s Hindustan lever Limited and others (1995) 83 Company cases 30 (SC)

The jurisdiction of the Court in sanctioning a claim of merger is not to ascertain mathematical accuracy if the determination satisfied the arithmetical test. A company court does not exercise an appellate jurisdiction. It exercises a jurisdiction founded on fairness. It is not required to interfere only because the figure arrived at by the valuer was not as good as it would have been if another method had been adopted. What is imperative is that such determination should not have been contrary to law and that it was not unfair for the shareholders of the company which was being merged.

The Hon'ble Supreme Court held "I do not think that the internal management, business activity or institutional operation of public bodies can be subjected to inspection by the court. To do so, is incompetent and improper and, therefore, out of bounds."

The **dominance of profits for valuation of share was emphasized in "McCathies case"** (Taxation, 69 CLR 1) where it was said that *"the real value of shares in a company will depend more on the profits which the company has been making and should be capable of making, having regard to the nature of its business, than upon the amount which the shares would realize on liquidation"*. This was also reiterated by the Indian Courts in Commissioner of Wealth Tax v. **MahadeoJalan's case (S.C.)** (86 ITR 621) and Additional Commissioner of Gift Tax v. Kusumben D. Mahadevia (S.C.) (122 ITR 38).

In the ultimate analysis, valuation will have to involve the exercise of judicious discretion and judgment considering all the relevant factors. There will always be several factors, e.g., present, and prospective competition, yield on comparable securities, and market sentiments etc. which are not evident from the face of the balance sheets but which will strongly influence the worth of a share.

Based on the facts of the case, we have valued **Ind Swift Limited (Transferor Company/ "ISL")** and **Ind Swift Laboratories Limited ("Transferee Company"/ "ISLL")** as per the Internationally Accepted Methodologies.

"Subject to the above read with the caveats as detailed later, we as a Merchant Banker hereby certify that pursuant to SEBI Master Circular no. SEBI/HO/CFD/POD-2/P/CIR/2023/93 dated June 20, 2023, we have reviewed the proposed Scheme of Arrangement for Amalgamation, the Valuation Report dated 16th May 2024 of Mr. Ajay Kumar Siwach, Registered Valuer, with respect to the share exchange ratio aspects and consider it to be fair and reasonable from the point of view of equity shareholders of the Companies".

("THE COMPANY") IN ITS MEETING HELD ON 18.05.2024 PURSUANT TO THE
PROVISIONS OF SECTION 232(2)(c) OF THE COMPANIES ACT, 2013.**

1. Background

- 1.1. The proposed Scheme of Arrangement for Amalgamation of Ind-Swift Limited ('Transferor Company') with Ind-Swift Laboratories Limited ('Transferee Company') and their respective shareholders and creditors under sections 230-232 of Companies Act, 2013 (the "**Scheme/ Scheme of Amalgamation**") was initially approved by the Board of Directors of Transferor Company vide resolution dated 25th September 2023 and further modified vide resolution dated 8th March, 2024. Pursuant to the direction issued by BSE Limited and National Stock Exchange of India Limited, the Board adopted a revised Scheme of Amalgamation vide resolution dated 18th May 2024.
- 1.2. This report of the Board is accordingly being made in pursuance to the requirements of Section 232(2) (c) of the Companies Act, 2013.
- 1.3. The following documents were placed before the Board:
 - 1.3.1. Scheme as approved by the Directors on 25th September, 2023 and 8th March, 2024.
 - 1.3.2. Revised Scheme duly initialed by the Directors for the purpose of identification.
 - 1.3.3. Valuation Report dated 25th September, 2023 of Ajay Kumar Siwach, Registered Valuer- Securities or Financial Assets ("the Valuers") describing the methodology adopted by them in arriving at the Share Exchange Ratio; and; Fairness opinion dated 25th September, 2023 obtained from Ekadrisht Capital Private Limited, SEBI Registered, Category-I, Merchant Banker;
 - 1.3.4. Valuation Report dated and 16th May, 2024 of Ajay Kumar Siwach, Registered Valuer- Securities or Financial Assets ("the Valuers") describing the methodology adopted by them in arriving at the Share Exchange Ratio; and; Fairness opinion dated 17th May, 2024 obtained from Ekadrisht Capital Private Limited, SEBI Registered, Category-I, Merchant Banker;
 - 1.3.5. - 1.3.6. Report of the Audit Committee of the Company dated 25th September, 2023, recommending the Scheme taking into consideration inter alia, the valuation report, and commenting on the need for the Scheme, rationale of the Scheme, cost benefit analysis of the Scheme, impact of the Scheme on the shareholders of the Company and synergies of business of entities involved; and; the subsequent report of the Committee of Independent Directors of the Company dated 18th May, 2024.

2. **Need and Rationale of Scheme of Arrangement:**

This Scheme of Amalgamation would result, inter-alia, in the following synergies for both the Transferor and Transferee companies and thereby preserving and creating value for its shareholders, creditors and various other stakeholders:

2.1.1. **Expansion into the Formulation Business:**

The Transferee Company had been engaged in the API business and recently exited the API business. It intends to focus and grow the formulations business which offers significant potential and growth opportunities going forward. To establish its presence in the formulations business, it has already made certain investments in two joint ventures. Since the Transferor company is engaged in Formulations business for a while and has already build capacity for the same, the Proposed Amalgamation would augment and spearhead this strategic shift of the Transferee Company into formulations business inorganically by combining the present formulations business of the Transferor Company along with access to its resources and expertise, enabling a more comprehensive and competitive player in the pharmaceutical formulations market.

2.1.2. **Takeover / Discharge of the debt of the Transferor Company and thereby relieve it from financial stress:**

The Transferor Company has been under severe financial stress and has been facing challenges in discharging its debt obligations, with a significant lump-sum payment due in March 2024. The Transferor Company has in the past made numerous efforts to raise funds to fulfil its debt repayment obligations without much success and thereby pushing the Transferor company to brink of an IBC process which may lead to disintegration of the promising formulation business and various stakeholders losing their value.

The Proposed Amalgamation will offer a bail out to the Transferor company from its debt obligation by providing the necessary funds to discharge its debt and ensure continuity of its formulation business and preservation of shareholder value,

alleviating creditors/ lenders pressure and ensuring a stronger / debt free merged entity ready for the long haul.

2.1.3. Value creation for Shareholders:

The Proposed Amalgamation is expected to contribute to economic value creation for both Transferor and Transferee companies. The shareholders of Transferor company will benefit from reduced finance costs, improved profitability and additional resources to fund the growth of formulations business. The shareholders of the Transferee company are expected to benefit from growth in the formulations business. Shareholders of both Company are also likely to benefit from the increased value created through business synergies, cost savings, reduction in administrative / operating costs and improved financial performance of the merged entity.

2.1.4. Simplification of Group structure:

The Proposed Amalgamation would lead to simplification of the Group structure by reducing one listed company, and thereby eliminating inefficiency and a cash trap on distribution of profits to shareholders in future. This will also lead to reduction of higher compliance/ reporting burden and administrative cost by reduction of one listed company. All of this will result in higher operational efficiencies and maximize value for the shareholders of both the companies.

2.1.5. Focused management, synergies, and Growth prospects:

The Proposed Amalgamation would not only create economies of scale but also simplify management and strategic focus, leading to a better long-term performance. The Amalgamation will facilitate better and more efficient control over the business and financial conduct of the merged company allowing a more streamlined and coordinated approach to governance and strategic decision-making.

The combined entity, on the back of its financial stability is likely to attract more opportunities for organic and inorganic growth viz., partnerships, acquisitions, and market expansion, translating into enhanced financial prospects.

In summary, the amalgamation of the Transferor Company with the Transferee Company is driven by strategic business objectives of preserving businesses of both companies, build strong foundation and achieve market competitiveness by combining the collective strength of both the companies, achieving business and

operational synergies & efficiencies, improved financial stability and performance, and thereby preserving and creating long-term value for its various stakeholders.

This comprehensive rationale as above underscores the strategic motivations, expected benefits, and the context surrounding the Proposed Amalgamation, highlighting its alignment with both the companies' objectives and the interests of their various stakeholders.

2.1.2. **Takeover / Discharge of the debt of the Transferor Company and thereby relieve it from financial stress:**

The Transferor Company has been under severe financial stress and has been facing challenges in discharging its debt obligations, with a significant lump-sum payment due in March 2024. The Transferor Company has in the past made numerous efforts to raise funds to fulfil its debt repayment obligations without much success and thereby pushing the Transferor company to brink of an IBC process which may lead to disintegration of the promising formulation business and various stakeholders losing their value.

The Proposed Amalgamation will offer a bail out to the Transferor company from its debt obligation by providing the necessary funds to discharge its debt and ensure continuity of its formulation business and preservation of shareholder value, alleviating creditors/ lenders pressure and ensuring a stronger / debt free merged entity ready for the long haul.

2.1.3. **Value creation for Shareholders:**

The Proposed Amalgamation is expected to contribute to economic value creation for both Transferor and Transferee companies. The shareholders of Transferor company will benefit from reduced finance costs, improved profitability and additional resources to fund the growth of formulations business. The shareholders of the Transferee company are expected to benefit from growth in the formulations business. Shareholders of both Company are also likely to benefit from the increased value created through business synergies, cost savings, reduction in administrative / operating costs and improved financial performance of the merged entity.

2.1.4. **Simplification of Group structure:**

The Proposed Amalgamation would lead to simplification of the Group structure by reducing one listed company, and thereby eliminating inefficiency and a cash trap on distribution of profits to shareholders in future. This will also lead to reduction of higher compliance/ reporting burden and administrative cost by reduction of one listed company. All of this will result in higher operational efficiencies and maximize value for the shareholders of both the companies.

2.1.5. **Focused management, synergies, and Growth prospects:**

The Proposed Amalgamation would not only create economies of scale but also simplify management and strategic focus, leading to a better long-term performance. The Amalgamation will facilitate better and more efficient control over the business and financial conduct of the merged company allowing a more streamlined and coordinated approach to governance and strategic decision-making.

The combined entity, on the back of its financial stability is likely to attract more opportunities for organic and inorganic growth viz., partnerships, acquisitions, and market expansion, translating into enhanced financial prospects.

To establish its presence in the formulations business, it has already made certain investments in two joint ventures. Since the Transferor company is engaged in Formulations business for a while and has already build capacity for the same, the Proposed Amalgamation would augment and spearhead this strategic shift of the Transferee Company into formulations business inorganically by combining the present formulations business of the Transferor Company along with access to its resources and expertise, enabling a more comprehensive and competitive player in the pharmaceutical formulations market.

The Transferor Company has in the past made numerous efforts to raise funds to fulfil its debt repayment obligations without much success and thereby pushing the Transferor company to brink of an IBC process which may lead to disintegration of the promising formulation business and various stakeholders losing their value.

This will also lead to reduction of higher compliance/ reporting burden and administrative cost by reduction of one listed company. All of this will result in higher operational efficiencies and maximize value for the shareholders of both the companies.

• **Focused management, synergies, and Growth prospects:**

The Proposed Amalgamation would not only create economies of scale but also simplify management and strategic focus, leading to a better long-term performance. The Amalgamation will facilitate better and more efficient control over the business and financial conduct of the merged company allowing a more streamlined and coordinated approach to governance and strategic decision-making.

The combined entity, on the back of its financial stability is likely to attract more opportunities for organic and inorganic growth viz., partnerships, acquisitions, and market expansion, translating into enhanced financial prospects.

A meeting of Independent Director Committee of Ind-Swift Limited was held on 25th September, 2023 to consider and recommend the proposed Scheme of Arrangement for Amalgamation of Ind-Swift Limited ('Transferor Company') with Ind-Swift Laboratories Limited ('Transferee Company') under Sections 230 to 232 of the Companies Act, 2013. This report of Independent Director Committee of the Company is being made in order to comply with the requirements of SEBI Master Circular no. SEBI/HO/CFD/POD-2/P/CIR/2023/93 dated June 20, 2023. The Independent Director committee has considered and reviewed the said Scheme of Arrangement and drawn out the following major points:

Background of the Companies involved in the proposed scheme:

- A. Ind-Swift Limited (herein after also referred to as 'ISL' or 'Transferor Company' or 'The Company')**, bearing CIN L24230CH1986PLC006897 was incorporated on 06th June, 1986 under the provisions of Companies Act, 1956 having registered office at 781, Industrial Area Phase II, Chandigarh -160002. Transferor Company is engaged in the business of manufacturing of Pharmaceutical Products. ISL is a leading pharmaceutical manufacturer of Finished Dosages Form (FDF) with national and international presence based in Chandigarh. Its strength lies in innovative pharmaceutical products. - B. Ind-Swift Laboratories Limited (herein after also referred to as 'ISLL' or 'Transferee Company')** bearing CIN L24232CH1995PLC015553 was incorporated on 04th January, 1995 under the provisions of Companies Act, 1956 having registered office at SCO 850, Shivalik Enclave, NAC, Manimajra Chandigarh - 160101. **Ind-Swift**

be completed. The Transferee Company is also listed on the bourses of BSE Limited and the National Stock Exchange of India Limited.

Following documents were placed before the Independent Director Committee:

- Draft Scheme on the proposed Scheme of Arrangement for Amalgamation of Ind-Swift Limited ('Transferor Company') with Ind-Swift Laboratories Limited ('Transferee Company');
- Valuation Report containing the Share Exchange Ratio dated 25th September, 2023 issued by Ajay Kumar Siwach, Registered Valuer- Securities or Financial Assets (Registration No. IBBI/RV/05/2019/11412);
- Fairness opinion dated 25th September, 2023 obtained from Ekadrisht Capital Private Limited, SEBI Registered, Category-I, Merchant Banker;

Salient features of Scheme of Arrangement:

The committee noted the following salient features of the scheme:

- The scheme provides for Amalgamation of Ind-Swift Limited ('Transferor Company') with Ind-Swift Laboratories Limited ('Transferee Company') with effect from the Appointed Date i.e., the Last date of the month following the month in which the closing happens as contemplated in the Business Transfer Agreement or such other date as may be approved by the Hon'ble National Company Law Tribunal of relevant jurisdiction or by such other competent authority having jurisdiction over the Transferor Company and the Transferee Company;
- The amalgamation of Transferor Company with Transferee Company is expected to enable better realization of potential of business and yield beneficial results. It will result in enhanced value creation for the companies involved in Scheme, their respective Shareholders and Creditors.

Need and Rationale of Scheme of Arrangement:

The committee noted the following rationale of the scheme:

This Scheme of Amalgamation would result, inter-alia, in the following synergies for both the Transferor and Transferee companies and thereby preserving and creating value for its shareholders, creditors and various other stakeholders:

- **Expansion into the Formulation Business:**
The Transferee Company had been engaged in the API business and recently exited the API business. It intends to focus and grow the formulations business

which offers significant potential and growth opportunities going forward. To establish its presence in the formulations business, it has already made certain investments in two joint ventures. Since the Transferor company is engaged in Formulations business for a while and has already build capacity for the same, the Proposed Amalgamation would augment and spearhead this strategic shift of the Transferee Company into formulations business inorganically by combining the present formulations business of the Transferor Company along with access to its resources and expertise, enabling a more comprehensive and competitive player in the pharmaceutical formulations market.

- **Takeover / Discharge of the debt of the Transferor Company and thereby relieve it from financial stress:**

The Transferor Company has been under severe financial stress and has been facing challenges in discharging its debt obligations, with a significant lump-sum payment due in March 2024. The Transferor Company has in the past made numerous efforts to raise funds to fulfil its debt repayment obligations without much success and thereby pushing the Transferor company to brink of an IBC process which may lead to disintegration of the promising formulation business and various stakeholders losing their value.

The Proposed Amalgamation will offer a bail out to the Transferor company from its debt obligation by providing the necessary funds to discharge its debt and ensure continuity of its formulation business and preservation of shareholder value, alleviating creditors/ lenders pressure and ensuring a stronger / debt free merged entity ready for the long haul.

- **Value creation for Shareholders:**

The Proposed Amalgamation is expected to contribute to economic value creation for both Transferor and Transferee companies. The shareholders of Transferor company will benefit from reduced finance costs, improved profitability and additional resources to fund the growth of formulations business. The shareholders of the Transferee company are expected to benefit from growth in the formulations business. Shareholders of both Company are also likely to benefit from the increased value created through business synergies, cost savings, reduction in administrative / operating costs and improved financial performance of the merged entity.

- **Simplification of Group structure:**

The Proposed Amalgamation would lead to simplification of the Group structure by reducing one listed company, and thereby eliminating inefficiency and cash

trap on distribution of profits to shareholders in future. This will also lead to reduction of higher compliance/ reporting burden and administrative cost by reduction of one listed company. All of this will result in higher operational efficiencies and maximize value for the shareholders of both the companies.

- **Focused management, synergies, and Growth prospects:**

The Proposed Amalgamation would not only create economies of scale but also simplify management and strategic focus, leading to a better long-term performance. The Amalgamation will facilitate better and more efficient control over the business and financial conduct of the merged company allowing a more streamlined and coordinated approach to governance and strategic decision-making.

The combined entity, on the back of its financial stability is likely to attract more opportunities for organic and inorganic growth viz., partnerships, acquisitions, and market expansion, translating into enhanced financial prospects.

In summary, the amalgamation of the Transferor Company with the Transferee Company is driven by strategic business objectives of preserving businesses of both companies, build strong foundation and achieve market competitiveness by combing the collective strength of both the companies, achieving business and operational synergies & efficiencies, improved financial stability and performance, and thereby preserving and creating long-term value for its various stakeholders.

This comprehensive rationale as above underscores the strategic motivations, expected benefits, and the context surrounding the Proposed Amalgamation, highlighting its alignment with both the companies' objectives and the interests of their various stakeholders.

Scheme Not Detrimental to the Shareholders of the Company:

The Committee members discussed and deliberated upon the rationale and salient features of the scheme, the valuation report and fairness opinion presented before the Committee. As per the valuation report issued by Independent Registered Valuer Ajay Kumar Siwach, Registered Valuer- Securities or Financial Assets (Registration No. IBBI/RV/05/2019/11412), the value per share of the Transferor Company and Transferee Company was arrived at INR 22.91/- and INR 150.13/- respectively.

Accordingly, share exchange ratio for issuance of new shares of the Transferee Company to the shareholders of the Transferor Company in consideration to the

proposed Scheme will be based upon their respective value per share as mentioned above i.e.

Transferee Company, without further application, act or deed, shall issue and allot to each of the shareholders of Transferor Company (other than the shares already held therein immediately before the amalgamation by Transferee Company, its Nominee or Subsidiary Company), shares in proportion of 100 (Hundred) equity shares of face value of Rs. 10 (Ten) each in Transferee Company for every 655 (Six Hundred and Fifty-Five) equity shares of face value of Rs. 2 (Two) each held by them in Transferor Company pursuant to this Scheme of Amalgamation.

The Committee is of the informed opinion that the proposed Scheme is in the best interests of the Shareholders of the Company and not detrimental to the interest of the Shareholders, including the minority shareholders of the Company.

Recommendation of the Independent Director Committee:

Having considered the documents, Valuation Report and Fairness Opinion, the Independent Director Committee hereby unanimously recommends that the aforesaid Scheme of Arrangement for Amalgamation is not detrimental to the interest of the Shareholders of the Company.

Information Other than the Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Annual report 2023-24 but does not include the Standalone Ind AS financial statements and our auditor's report thereon.

Our opinion on the Standalone Ind AS Financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Standalone Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether such other information is materially inconsistent with the Standalone Ind AS financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Standalone Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation

INDEPENDENT AUDITOR'S REPORT

REPORT ON THE AUDIT OF THE STANDALONE FINANCIAL STATEMENTS

of these Standalone Ind AS Financial Statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Financial Statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Standalone Ind AS Financial Statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the Standalone Ind AS financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Standalone Ind AS financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Standalone Ind AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Standalone Ind AS financial statements, including the disclosures, and whether the Standalone Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone Ind AS financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be

REPORT ON THE AUDIT OF THE STANDALONE FINANCIAL STATEMENTS

influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Standalone Ind AS financial statements for the financial year ended March 31, 2024 and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

INDEPENDENT AUDITOR'S REPORT

REPORT ON THE AUDIT OF THE STANDALONE FINANCIAL STATEMENTS

"Annexure B" to the Independent Auditor's Report of even date on the Financial Statements of Ind-Swift Limited

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

To the Members of **Ind-Swift Limited**

We have audited the internal financial controls over financial reporting of Ind-Swift Limited ("the Company") as of March 31, 2024 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's Management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting with reference to these standalone Financial Statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing as specified under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting with reference to these standalone Financial Statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting with reference to these standalone Financial Statements and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting with reference to these standalone Financial Statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting with reference to these standalone Financial Statements.

Meaning of Internal Financial Controls Over Financial Reporting with reference to these standalone Financial Statements

A company's internal financial control over financial reporting with reference to these standalone Financial Statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting with reference to these standalone Financial Statements includes those policies and procedures that (1) pertain

INDEPENDENT AUDITOR'S REPORT

REPORT ON THE AUDIT OF THE STANDALONE FINANCIAL STATEMENTS

to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting with reference to these standalone Financial Statements

Because of the inherent limitations of internal financial controls over financial reporting with reference to these standalone Financial Statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting with reference to these standalone Financial Statements to future periods are subject to the risk that the internal financial control over financial reporting with reference to these standalone Financial Statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting with reference to these standalone Financial Statements and such internal financial controls over financial reporting with reference to these standalone Financial Statements were operating effectively as at March 31, 2024, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

STANDALONE SIGNIFICANT ACCOUNTING POLICIES

A - SIGNIFICANT ACCOUNTING POLICIES

1. Basis of Preparation of Financial Statements

These financial statements have been prepared to comply with the Indian Accounting Standards (Ind AS). The Ind AS are prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules 2015 and Companies (Indian Accounting Standards) Amendment Rules 2016.

The Financial Statements are prepared on accrual basis under the historical cost convention. The financial statements are presented in Indian rupees rounded off to the nearest rupees in lacs.

Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

2. Use of Estimates

The preparation of the financial statements in conformity with Ind AS requires management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the period. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

3. Property, Plant & Equipment

(a) Freehold land is carried at cost. All others items of Property, Plant and equipment have been stated at cost less accumulated depreciation and impairment loss if any. Cost of acquisition or construction is inclusive of freight, non refundable taxes or Levies, fees and incidental expenses to bring the assets to its present condition and location and interest on loans attributable to the acquisition of assets up to the date of commissioning of assets. Cost of assets not ready for intended use before the year end, are shown as capital –work-in- progress.

(b) The Company is following the useful life by applying straight line method of depreciation as per the useful life specified in part C of Schedule II of the Companies Act 2013.

On assets sold, discarded etc, during the year depreciation is provided up to the date of sale/discard.

4. Leases

The Company's lease asset classes consist primarily of land and buildings . The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether : (i) the contract involves the use of an identified asset (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Company has the right to direct the use of the asset. At the date of commencement of the lease, the Company recognizes a right-of-use (ROU) asset and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of 12 months or less (short-term leases) and low value leases.

For these short-term and low-value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease. Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

The ROU assets are initially recognized at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses. ROU assets are depreciated

STANDALONE SIGNIFICANT ACCOUNTING POLICIES

from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. ROU assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable.

The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of these leases.

Lease liabilities are remeasured with a corresponding adjustment to the related ROU asset if the Company changes its assessment of whether it will exercise an extension or a termination option. Lease liability and ROU assets have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

5. Intangible Assets

- (a) Intangible assets are measured at cost and amortized over their useful life.
- (b) Expenditure on Research phase is recognised as an expense when it is incurred.
- (c) Expenditure on product development phase is recognised as an Intangible Asset, These assets are amortized over the useful period of life starting from the year when the asset first meets the following recognition criteria:
 - The technical feasibility of completing the intangible asset so that it will be available for use or sale;
 - The intention to complete the intangible asset and use or sell it;
 - the ability to use or sell the intangible asset;
 - how the intangible asset will generate probable future economic benefits;
 - the availability of adequate technical , financial and other resources to complete the development and to use or sell the intangible asset; and
 - the ability to measure reliably the expenditure attributable to the intangible asset during its development.
- (d) Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset , are recognised in statement of profit and loss when the asset is derecognized.

6. Inventories are valued as under

- (a) Stock of Raw Material, Packing Material and Store & Spares :- At Cost or Net Realizable Value, whichever is lower. Cost ascertained on FIFO basis, excluding recoverable rates and taxes. Cost includes cost of purchase & other cost incurred in bringing the inventories to their present location.
- (b) Stock of work in progress: - At material cost plus apportioned manufacturing overheads or net realizable value whichever is lower.
- (c) Stock of Finished Goods: - At Cost or Net Realizable Value, whichever is lower. Cost includes material cost plus apportioned manufacturing overheads and expenditure incurred in the normal course of business in bringing such inventories to its present location.
- (d) Stock in Transit: At Cost

7. Investments

Investments are classified into current and long term Investments.

- (a) Long term investments are stated at cost of acquisition. Provision for diminution is made only to recognize a decline

STANDALONE SIGNIFICANT ACCOUNTING POLICIES

other than temporary, if any, in the value of investments.

(b) Current investments are carried at lower of cost and fair market value.

8. Revenue Recognition

The Company derives revenues primarily from sale of pharmaceutical formulation business.

Ind AS 115 "Revenue from Contracts with Customers" provides a control-based revenue recognition model and provides a Five step application approach to be followed for revenue recognition.

- "1. Identify the contract(s) with a customer;
2. Identify the performance obligations;
3. Determine the transaction price;
4. Allocate the transaction price to the performance obligations;
5. Recognise revenue when or as an entity satisfies performance obligation."

"Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has generally concluded that it is the principal in its revenue arrangements, except for the agency services below, because it typically controls the goods or services before transferring them to the customer.

Revenue excludes amounts collected on behalf of third parties. The disclosures of significant accounting judgements, estimates and assumptions relating to revenue from contracts with customers are provided in Note 19 and disclosures of transition approach along with impact of adoption of Ind AS 115 on financial statements are provided in Note 20.1"

9.1 Sale of Goods

"For sale of goods, revenue is recognised when control of the goods has transferred at a point in time i.e. when the goods have been delivered to the specific location (delivery). Following delivery, the customer has full discretion over the responsibility, manner of distribution, price to sell the goods and bears the risks of obsolescence and loss in relation to the goods. A receivable is recognised by the Company when the goods are delivered to the customer as this represents the point in time at which the right to consideration becomes unconditional, as only the passage of time is required before payment is due. Payment is due within 0-180 days. The Company considers the effects of variable consideration, the existence of significant financing components, noncash consideration, and consideration payable to the customer (if any)."

Net sales are exclusive of GST and Trade discount.

9.2 Contract Balances

Trade receivables

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets.

Contract liabilities

"A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract."

9.3 Cost to obtain a contract

The Company pays sales commission to its selling agents for as per the agreement. The Company has elected to apply

STANDALONE SIGNIFICANT ACCOUNTING POLICIES

the optional practical expedient for costs to obtain a contract which allows the Company to immediately expense sales commissions (included in selling and distribution expenses) because the amortization period of the asset that the Company otherwise would have used is one year or less.

Costs to fulfil a contract i.e. freight, insurance and other selling expenses are recognized as an expense in the period in which related revenue is recognised.

9.4 Other revenue streams

Export and Other Incentives

"In case of sale made by the Company as Manufacturer, export benefits arising from Duty Entitlement Pass Book(DEPB), Merchandise Export Incentive Scheme, and Focus Market Scheme are recognised on date of actual receipt of such license from authority."

In case of sale made by the Company as Manufacturer, export benefits arising from Duty Drawback scheme, Rebate of State Levies (ROSL), and Rebate of State and Central Taxes and Levies (ROSCTL), are recognised on sale of such goods in accordance with the agreed terms and conditions with customers.

"Revenue from exports benefits measured at the fair value of consideration received or receivable net of returns and allowances, cash discounts, trade discounts and volume rebates."

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Consolidated Ind AS financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Consolidated Ind AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Holding Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Consolidated Ind AS financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Consolidated Ind AS financial statements, including the disclosures, and whether the Consolidated Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group of which we are the independent auditors and whose financial information we have audited, to express an opinion on the

consolidated Ind AS financial statements. We are responsible for the direction, supervision and performance of the audit of the financial statements of such entities included in the consolidated Ind AS financial statements of which we are the independent auditors. For the other entities included in the consolidated Ind AS financial statements, which have been audited by other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion.

We communicate with those charged with governance of the Holding Company and such other entities included in the consolidated Ind AS financial statements of which we are the independent auditors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Consolidated Ind AS financial statements for the financial year ended March 31, 2024 and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

INDEPENDENT AUDITOR'S REPORT

REPORT ON THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

**“Annexure B” to the Independent Auditor’s Report of even date on the Consolidated Financial Statements of Ind-Swift Limited
Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013
 (“the Act”)**

To the Members of **Ind-Swift Limited**

In conjunction with our audit of the consolidated financial statements of Ind Swift Limited as of and for the year ended March 31, 2024, we have audited the internal financial controls over financial reporting of Ind Swift Limited (hereinafter referred to as the “Holding Company”), as of that date. Internal financial controls under clause (i) of sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”) is not applicable on the subsidiary companies which are part of the Group and are incorporated outside India. The IFC are applicable on the Indian subsidiaries, which is the responsibility of the management of subsidiary companies and are audited by their respective auditors. We do not form opinion on the same because of lack of audited financial statement of subsidiaries.

Management’s Responsibility for Internal Financial Controls

The Board of Directors of the Holding Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Holding Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor’s Responsibility

Our responsibility is to express an opinion on the company's internal financial controls over financial reporting with reference to these consolidated financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, both, issued by Institute of Chartered Accountants of India, and deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls.

Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting with reference to these consolidated financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls over financial reporting with reference to these consolidated financial statements and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting with reference to these consolidated financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls over financial reporting with reference to these consolidated financial statements.

Meaning of Internal Financial Controls Over Financial Reporting with reference to these Consolidated Financial Statements

A company's internal financial control over financial reporting with reference to these consolidated financial statements

INDEPENDENT AUDITOR'S REPORT

REPORT ON THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting with reference to these consolidated financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting with reference to these Consolidated Financial Statements

Because of the inherent limitations of internal financial controls over financial reporting with reference to these consolidated financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting with reference to these consolidated financial statements to future periods are subject to the risk that the internal financial control over financial reporting with reference to these consolidated financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Holding Company have, maintained in all material respects, adequate internal financial controls over financial reporting with reference to these consolidated financial statements and such internal financial controls over financial reporting with reference to these consolidated financial statements were operating effectively as at March 31,2024, based on the internal control over financial reporting criteria established by the Holding Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

The Ind AS are prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules 2015 and Companies (Indian Accounting Standards) Amendment Rules 2016.

The Consolidated Financial Statements are prepared on accrual basis under the historical cost convention. The financial statements are presented in Indian rupees rounded off to the nearest rupees in lacs.

Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

2. Use of Estimates

The preparation of the Consolidated financial statements in conformity with Ind AS requires management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the Consolidated financial statements and reported amounts of revenues and expenses during the period. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the Consolidated financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the Consolidated financial statements.

3. Property, Plant & Equipment

(a) Freehold land is carried at cost. All other items of Property, Plant and equipment have been stated at cost less accumulated depreciation and impairment loss if any. Cost of acquisition or construction is inclusive of freight, non refundable taxes or Levies, fees and incidental expenses to bring the assets to its present condition and location and interest on loans attributable to the acquisition of assets up to the date of commissioning of assets. Cost of assets not ready for intended use before the year end, are shown as capital –work-in- progress.

4. Leases

The Company's lease asset classes consist primarily of land and buildings. The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right

CONSOLIDATED SIGNIFICANT ACCOUNTING POLICIES

to control the use of an identified asset, the Company assesses whether : (i) the contract involves the use of an identified asset (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Company has the right to direct the use of the asset. At the date of commencement of the lease, the Company recognizes a right-of-use (ROU) asset and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of 12 months or less (short-term leases) and low value leases.

For these short-term and low-value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease. Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

The ROU assets are initially recognized at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses. ROU assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. ROU assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable.

The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of these leases.

Lease liabilities are remeasured with a corresponding adjustment to the related ROU asset if the Company changes its assessment of whether it will exercise an extension or a termination option. Lease liability and ROU assets have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

5. Intangible Assets

 - the ability to use or sell the intangible asset;
 - how the intangible asset will generate probable future economic benefits;

Independent Auditor's Report

TO THE MEMBERS OF IND-SWIFT LABORATORIES LIMITED

Report on the Audit of The Standalone Ind AS Financial Statements

Opinion

We have audited the accompanying Standalone Ind AS financial statements of IND-SWIFT LABORATORIES LIMITED ("the Company"), which comprises the Balance Sheet as at March 31, 2024, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement for Changes in Equity and the Statement of Cash Flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information (hereinafter referred to as "standalone financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone Ind AS financial statements give the information required by the Companies Act 2013, as amended ("Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2024, its loss including other comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the standalone Ind AS financial statements in accordance with the Standards on Auditing ("SA's"), as specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the 'Auditor's Responsibilities for the Audit of the Standalone Ind AS Financial Statements' section of our report. We are independent of the Company in accordance with the 'Code of Ethics' issued by the Institute of Chartered Accountants of India ("ICAI") together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Standalone Ind AS financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the Standalone Ind AS Financial Statements of the current period. These matters were addressed in the context of our audit of the Standalone Ind AS Financial Statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context. We have determined the matters described below to be the key audit matters to be communicated in our report.

Key Audit Matters	How our audit assessed Key audit matters
<p>Evaluation of Uncertain tax Positions</p> <p>The company has material uncertain tax positions including matters under dispute which involves significant judgment to determine the possible outcome of these disputes.</p> <p>Refer Notes to accounts No. XXVI to the Financial statements`</p>	<ul style="list-style-type: none"> • Obtained the details of completed tax assessments and demands as on 31/03/2024 from Management. • We involved our expertise to challenge the management's underlying assumptions in estimating tax provision and the possible outcome of the disputes. • We have also considered legal precedence and other rulings in evaluating management's position on these uncertain tax positions.

Emphasis of Matters

Without qualifying our opinion, we draw attention to the following matters in the Notes to the financial statements:

- a) Emphasis is drawn upon Note No. XXXI of the accompanying standalone financial statements, the company has entered into Business transfer agreement with M/s Synthimed Labs Private Limited (SLPL) under the scheme of slump sale for a consideration of ₹1650 Crore and accordingly transferred all the assets and liabilities to SLPL as per scheme of transfer as on 18th March 2024.
- b) Emphasis is drawn upon Note No. V of the accompanying standalone financial statements, M/s Ind-Swift Laboratories Limited (ISLL) has acquired a loan for ₹352.60 Crores from Edelweiss, a lender, in relation to the loan provided to Indswift Ltd along with all other rights and unsustainable debt of ₹463.17 in terms of the Loan Agreement with Ind-Swift dated 30.03.2024. The unsustainable part/zero coupon debt is payable fully in case of default in repayment of the term loan facility and to be waived off on the successful repayment of the term loan facility.

Under the principles of Ind AS 37, "Provisions, Contingent Liabilities and Contingent Assets," the additional rights to recover unsustainable debt is recognized as a contingent asset. This is based on the possibility of future economic benefits that may arise if certain conditions are met. As such, the unsustainable debt, which is a zero coupon debt; which will be waived off on timely repayment of the loan facility, is disclosed as a contingent asset in the balance sheet.

"Our opinion is not modified in respect of the above matters".

Information Other than the Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Annual report 2023-24 but does not include the Standalone Ind AS financial statements and our auditor's report thereon.

Our opinion on the Standalone Ind AS Financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Standalone Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether such other information is materially inconsistent with the Standalone Ind AS financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Standalone Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these Standalone Ind AS Financial Statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Financial Statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Standalone Ind AS Financial Statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the Standalone Ind AS financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Standalone Ind AS financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Standalone Ind AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to

those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Standalone Ind AS financial statements, including the disclosures, and whether the Standalone Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone Ind AS financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be

thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Standalone Ind AS financial statements for the financial year ended March 31, 2024 and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

“Annexure B” to the Independent Auditor’s Report of even date on the Financial Statements of Ind-Swift Laboratories Limited

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

To the Members of Ind-Swift Laboratories Limited

We have audited the internal financial controls over financial reporting of Ind-Swift Laboratories Limited (“the Company”) as of March 31, 2024 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s Management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (“ICAI”). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor’s Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting with reference to these standalone Financial Statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) and the Standards on Auditing as specified under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting with reference to these standalone Financial Statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting with reference to these standalone Financial Statements and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting with reference to these standalone Financial Statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting with reference to these standalone Financial Statements.

Meaning of Internal Financial Controls Over Financial Reporting with reference to these standalone Financial Statements

A company’s internal financial control over financial reporting with reference to these standalone Financial Statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting with reference to these standalone Financial Statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting with reference to these standalone Financial Statements

Because of the inherent limitations of internal financial controls over financial reporting with reference to these standalone Financial

Statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting with reference to these standalone Financial Statements to future periods are subject to the risk that the internal financial control over financial reporting with reference to these standalone Financial Statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting with reference to these standalone Financial Statements and such internal financial controls over financial reporting with reference to these standalone Financial Statements were operating effectively as at March 31, 2024, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Company is global manufacturer of APIs, Intermediates and formulations (through group collaboration). Having commenced operations in 1997 as an API manufacturer, the Company continued to focus on this business domain as its key business driver.

2.0 STATEMENT OF COMPLIANCE

The standalone financial statements have been prepared in accordance with Indian Accounting Standards ("Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) Amendment Rules, 2016, as applicable. For periods up to and including the year ended March 31, 2017, the Company prepared its financial statements in accordance with the then applicable Accounting Standards in India ('previous GAAP').

2.1 BASIS OF MEASUREMENT

The standalone financial statements have been prepared on the historical cost basis except for: - certain financial assets and liabilities.

2.2 PROPERTY PLANT & EQUIPMENT

2.2.1 COST OF PROPERTY PLANT & EQUIPMENT

All Property, plant and equipment held for use in the production or supply of goods or services, or for administrative purposes, are valued at cost/revalued cost net of tax credit wherever eligible. Cost includes all expenses and borrowing cost attributable to the project till the date of commercial production / ready to use. Any asset transferred to assets held for sale is value at cost or NRV whichever is lower.

2.2.2 DEPRECIATION /AMORTIZATION

Depreciation is recognized so as to write off the cost of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis. Depreciation is provided on straight line method at the rates specified in schedule II of the Companies Act 2013 on pro rata basis and the assets having the value up to ₹5000 have been depreciated at the rate of 100%. The policy

of company is to provide depreciation on the Buildings , Plant & Machinery and Other Fixed assets from the date of commercial production/ ready to use.

2.2.3 INVESTMENT PROPERTY

Properties that is held for long-term rentals or for capital appreciation or both, and that is not occupied by the Group, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalized to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the group and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of the investment property is replaced, the carrying amount of the replaced part is derecognized.

Investment property are depreciated using the straight line method over their estimated useful lives.

On transition to Ind AS, the Group has elected to continue with the carrying value of its investment property recognized as at April 1, 2016 measured as per the previous GAAP and use that carrying value as the deemed cost of investment properties.

2.2.4 INTANGIBLE ASSETS (OTHER ASSETS)

Intangible Assets with definite useful lives are subject to amortization and are reviewed to determine whether there is any indication that carrying Value of these assets may not be recoverable . Management judgment is required in the area of intangible assets loss particularly in assessing :

Whether an event has occurred that may indicate that the related assets values may not be recoverable or

Whether the carrying value of an intangible assets can be supported by the recoverable amount , being the fair value less costs to sell or net present value of future cash flows which are estimated based upon the continued use of the asset in the group .

Useful Lives of Intangible assets:

Intangible assets related to R&D are amortized over the period of 5 years on straight line method.

2.2.5 LEASES

The Company's lease asset classes consist primarily of land and buildings . The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or

Notes to Standalone Financial Statement

For the year ended 31st March, 2024

contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether : (i) the contract involves the use of an identified asset (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Company has the right to direct the use of the asset. At the date of commencement of the lease, the Company recognizes a right-of-use (ROU) asset and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of 12 months or less (short-term leases) and low value leases.

For these short-term and low-value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease. Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

The ROU assets are initially recognized at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses. ROU assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. ROU assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable.

The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of these leases.

Lease liabilities are remeasured with a corresponding adjustment to the related ROU asset if the Company changes its assessment of whether it will exercise an extension or a termination option. Lease liability and ROU assets have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

2.3 BORROWING COSTS

Borrowing costs that are directly attributable to the acquisition, construction or production of qualifying assets

have been capitalized as part of cost of assets. Other Borrowing costs are recognized as an expense in the period in which they are incurred.

2.4 INVENTORIES

Inventories are valued at lower of cost and net realizable value, Cost includes all charges in bringing the goods to point of sale. Cost is determined as follows.

2.4.1 Raw Materials and stores and spares are valued on weighted average basis.

2.4.2 Work in Process is valued at estimated cost basis and an appropriate share of production overheads or net realizable value whichever is less.

2.4.3 Finished Goods are valued at cost and an appropriate share of production overheads or net realizable value whichever is less.

2.4.4 Stock in Trade are valued at weighted average basis.

2.5 REVENUE RECOGNITION

The Company derives revenues primarily from sale of API business.

Ind AS 115 "Revenue from Contracts with Customers" provides a control-based revenue recognition model and provides a

Five step application approach to be followed for revenue recognition.

1. Identify the contract(s) with a customer;
2. Identify the performance obligations;
3. Determine the transaction price;
4. Allocate the transaction price to the performance obligations;
5. Recognize revenue when or as an entity satisfies performance obligation.

Revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has generally concluded that it is the principal in its revenue arrangements, except for the agency services below, because it typically controls the goods or services before transferring them to the customer.

Revenue excludes amounts collected on behalf of third parties. The disclosures of significant accounting

Notes to Standalone Financial Statement

For the year ended 31st March, 2024

judgements, estimates and assumptions relating to revenue from contracts with customers are provided in Note XV and disclosures of transition approach along with impact of adoption of Ind AS 115 on financial statements are provided in Note 2.18

2.5.1 SALE OF GOODS

For sale of goods, revenue is recognized when control of the goods has transferred at a point in time i.e. when the goods have been delivered to the specific location (delivery). Following delivery, the customer has full discretion over the responsibility, manner of distribution, price to sell the goods and bears the risks of obsolescence and loss in relation to the goods. A receivable is recognized by the Company when the goods are delivered to the customer as this represents the point in time at which the right to consideration becomes unconditional, as only the passage of time is required before payment is due. Payment is due within 0-180 days. The Company considers the effects of variable consideration, the existence of significant financing components, noncash consideration, and consideration payable to the customer (if any).

2.5.2 CONTRACT BALANCES

Trade receivables

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets.

Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the

Company transfers goods or services to the customer, a contract liability is recognized when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognized as revenue when the Company performs under the contract."

2.5.3 Cost to obtain a contract

The Company pays sales commission to its selling agents for each contract that they obtain for the Company. The Company has elected to apply the optional practical expedient for costs to obtain a contract which allows the Company to immediately expense sales commissions (included in advertisement and sales promotion expense

under other expenses) because the amortization period of the asset that the Company otherwise would have used is one year or less.

Costs to fulfil a contract i.e. freight, insurance and other selling expenses are recognized as an expense in the period in which related revenue is recognized.

2.5.4 Other revenue streams

EXPORT & OTHER INCENTIVES

In case of sale made by the Company as Manufacturer, export benefits arising from Duty Entitlement Pass Book (DEPB), Merchandise Export Incentive Scheme, and Focus Market Scheme are recognized on accrual basis on fulfilment of eligibility criteria for availing the incentives and when there is no uncertainty in receiving the same. Defined Benefit Plans for defined benefit retirement plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected immediately in the balance sheet with a charge or credit recognized in other comprehensive income in the period in which they occur. Remeasurement recognized in other comprehensive income is reflected immediately in retained earnings and is not reclassified to statement. of profit and loss. Past service cost is recognized in statement of profit and loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset.

- service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- net interest expense or income; and
- remeasurement

The Group presents the first two components of defined benefit costs in statement of profit and loss in the line item

'Employee benefits expense'. Curtailment gains and losses are accounted for as past service costs.

The retirement benefit obligation recognized in the balance sheet represents the actual deficit or surplus in the Group's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

Defined contribution plans which include contribution to the provident fund are recognized as expense when employees have rendered services entitling them to such benefits..

The compensated absences are provided on the basis of actuarial valuation of employees entitlement in accordance with company's rules."

2.8 Share Based Payment Arrangements

Share-based payment transactions of the Company Equity-settled share-based payments to employees are measured at the Fair value of the equity instruments at the grant date. The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Company's estimate of equity instruments that will eventually vest, with a corresponding increase in equity. At the end of each reporting period, the Company revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognized in statement of profit and loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the equity-settled employee benefits reserve."

2.9 TAXATION

2.9.1 Current tax

Current tax is the tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the standalone statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

2.9.2 Deferred Tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the standalone financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax

Notes to Standalone Financial Statement

For the year ended 31st March, 2024

liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognized if the temporary difference arises from the initial recognition of goodwill. The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets include Minimum Alternate Tax (MAT) paid in accordance with the tax laws in India, which is likely to give future economic benefits in the form of availability of set-off against future tax liability. Accordingly, MAT is recognized as deferred tax asset in the Balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with the asset will be realized.

2.9.3 Current and deferred tax for the year

Current and deferred tax are recognized in statement of profit and loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively.

2.10 PROVISION, CONTINGENT LIABILITIES AND CONTINGENT ASSETS

"A provision is recognized when there is a present obligation as a result of a past event, that probably requires an outflow of resources and a reliable estimate can be made to settle the amount of obligation. Provision is discounted to its present value wherever required and is determined based

on the last estimate required to settle the obligation at the year end. These are reviewed at each year end and adjusted to reflect the best current estimate.

Contingent liabilities are disclosed in notes when there is a possible obligation that rises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity. Contingent assets are neither recognized nor disclosed in the financial statements.

2.11 GOVERNMENT GRANTS

Government grants are initially recognized as income at fair value if there is reasonable assurance that they will be received and the Group will comply with the conditions associated with the grant;

- In case of capital grants, they are then recognized in Statement of Profit and Loss as other income on a systematic basis over the useful life of the asset.
- In case of grants that compensate the Group for expenses incurred are recognized in Consolidated Statement of Profit and Loss on a systematic basis in the periods in which the expenses are recognized."

2.12 FINANCIAL INSTRUMENTS

2.12.1 Investment in subsidiaries, associates and joint ventures

The Company has accounted for its investments in subsidiaries, associates and joint ventures at cost less impairment.

2.12.2 Other financial assets and financial liabilities

Other financial assets and financial liabilities are recognized when Company becomes a party to the contractual provisions of the instruments.

Initial recognition and measurement: Other financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in statement of profit and loss.

Subsequent measurement: Financial assets at amortized

Notes to Standalone Financial Statement

For the year ended 31st March, 2024

cost. Financial assets are subsequently measured at amortized cost if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and contractual terms of financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through other comprehensive income

Financial assets are measured at fair value through other comprehensive income if these financial assets are held within business whose objective is achieved by both collecting contractual cash flows on specified dates that are solely payments of principal and interest on the principal amount outstanding and selling financial assets.

Financial assets at fair value through Profit & loss Account

Financial assets are measured at fair value through profit or loss unless it measured at amortized cost or fair value through other comprehensive income on initial recognition. The transaction cost directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognized in the statement of profit and loss.

Financial liabilities

Recognition of Financial liabilities

Financial liabilities are measured at amortized cost using effective interest rate method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

De-Recognition of Financial liabilities

The difference between the carrying amount of a financial liability extinguished or transferred to another party and the consideration paid, including any non cash assets transferred or liabilities assumed shall be recognized in profit or loss account. Further the company applies extinguishment accounting/modification accounting as per IND-AS 109.

2.12.3 Equity Instruments

An equity instrument is a contract that evidences residual interest in the assets of the company after deducting all of its liabilities. Equity instruments recognized by the Company are recognized at the proceeds received net off direct issue cost.

2.13 IMPAIRMENT OF ASSETS

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, Corporate assets are also allocated to individual cash generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in statement of profit and loss.

2.14 TRADE RECEIVABLES & ADVANCES

“Sundry debtors outstanding for more than three years at the end of Balance Sheet date will be written off from the books of accounts except disputed debtors having matters pending under different Courts.

Other advances and related party balances outstanding for more than 3 years are reviewed by the management at the end of every financial year and are written off as per the judgment of the management.”

2.15 OPERATING CYCLE

Based on the nature of products / activities of the Group and the normal time between acquisition of assets and their realization in cash or cash equivalents, the Group has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

Notes to Standalone Financial Statement

For the year ended 31st March, 2024

2.16 KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Company's accounting policies, the directors of the Company are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources.

The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year."

2.16.1 Useful lives of property, plant and equipment and Intangible assets

The Company reviews the useful life of property, plant and equipment at the end of each reporting period. This assessment may result in change in the depreciation expense in future periods.

2.16.2 Employee Benefits

The cost of defined benefit plans are determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Due to the long-term nature of these plans, such estimates are subject to significant uncertainty.

2.16.3 Litigations

The Company is a party to certain commercial disputes and has also received notification of claims for significant amounts. There are number of factors that may affect the ultimate outcome in respect of this matter and accordingly, it is difficult to assess the impact of these disputes with accuracy.

2.17 OTHER ACCOUNTING POLICIES

Accounting Policies not specifically referred to are in accordance with generally accepted accounting principles including the Indian Accounting Standards (Ind AS) prescribed under section 133 of the Act.

In our opinion and to the best of our information and according to the explanations given to us, and based on the consideration of reports of other auditors on separate financial statements and on the other financial information of the subsidiaries the aforesaid Consolidated Ind AS financial statements give the information required by the Companies Act 2013, as amended ("Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Group as at March 31, 2024, their consolidated loss including other comprehensive income, their consolidated cash flows and the consolidated statement of changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the Consolidated Ind AS financial statements in accordance with the Standards on Auditing ("SA's"), as specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the 'Auditor's Responsibilities for the Audit of the Consolidated Ind AS Financial Statements' section of our report. We are independent of the Group in accordance with the 'Code of Ethics' issued by the Institute of Chartered Accountants of India ("ICAI") together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Consolidated Ind AS financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the Consolidated Ind AS Financial Statements of the current period. These matters were addressed in the context of our audit of the Consolidated Ind AS Financial Statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context. We have determined the matters described below to be the key audit matters to be communicated in our report.

Emphasis of Matters

Without qualifying our opinion, we draw attention to the following matters in the Notes to the financial statements:

- a) Emphasis is drawn upon Note No. XXXI of the accompanying consolidated financial statements, the company has entered into Business transfer agreement with M/s Synthimed Labs Private Limited (SLPL) under the scheme of slump sale for a consideration of ₹1650 Crore and accordingly transferred all the assets and liabilities to SLPL as per scheme of transfer as on 18th March 2024.

Under the principles of Ind AS 37, "Provisions, Contingent Liabilities and Contingent Assets," the additional rights to recover unsustainable debt is recognized as a contingent asset. This is based on the possibility of future economic benefits that may arise if certain conditions are met. As such, the unsustainable debt, which is a zero coupon debt; which will be waived off on timely repayment of the loan facility, is disclosed as a contingent asset in the balance sheet.

"Our opinion is not modified in respect of the above matters".

The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting with reference to these Consolidated Financial Statements.

Meaning of Internal Financial Controls Over Financial Reporting with reference to these Consolidated Financial Statements

A company’s internal financial control over financial reporting with reference to these Consolidated Financial Statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting with reference to these Consolidated Financial Statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting with reference to these Consolidated

Financial Statements

Because of the inherent limitations of internal financial controls over financial reporting with reference to these Consolidated Financial Statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting with reference to these Consolidated Financial Statements to future periods are subject to the risk that the internal financial control over financial reporting with reference to these Consolidated Financial Statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the holding Company has, in all material respects, adequate internal financial controls system over financial reporting with reference to these Consolidated Financial Statements and such internal financial controls over financial reporting

with reference to these Consolidated Financial Statements were operating effectively as at March 31, 2024, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

ROU assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. The lease liability is initially measured at amortized cost at the present value of the future lease payments. (ix) The rationale of the Scheme is as below:

This Scheme of Amalgamation would result, inter-alia, in the following synergies for both the Transferor and Transferee companies and thereby preserving and creating value for its shareholders, creditors and various other stakeholders:

(a) Expansion into the Formulation Business:

The Transferee Company had been engaged in the API business and recently exited the API business. It intends to focus and grow the formulations business which offers significant potential and growth opportunities going forward. To establish its presence in the formulations business, it has already made certain investments in two joint ventures. Since the Transferor company is engaged in Formulations business for a while and has already build capacity for the same, the Proposed Amalgamation would augment and spearhead this strategic shift of the Transferee Company into formulations business inorganically by combining the present formulations business of the Transferor Company along with access to its resources and expertise, enabling a more comprehensive and competitive player in the pharmaceutical formulations market.

(b) Takeover / Discharge of the debt of the Transferor Company and thereby relieve it from financial stress:

The Transferor Company has been under severe financial stress and has been facing challenges in discharging its debt obligations, with a significant lump-sum payment due in March 2024. The Transferor Company has in the past made numerous efforts to raise funds to fulfil its debt repayment obligations without much success and thereby pushing the Transferor company to brink of an IBC process which may lead to disintegration of the promising formulation business and various stakeholders losing their value. The Proposed Amalgamation will offer a bail out to the Transferor company from its debt obligation by providing the necessary funds to discharge its debt and ensure continuity of its formulation business and preservation of shareholder value, alleviating creditors/ lenders pressure and ensuring a stronger / debt free merged entity ready for the long haul.

(c) Value creation for Shareholders:

The Proposed Amalgamation is expected to contribute to economic value creation for both Transferor and Transferee companies. The shareholders of Transferor company will benefit from reduced finance costs, improved profitability and additional resources to fund the growth of formulations business. The shareholders of the Transferee company are expected to benefit from growth in the formulations business. Shareholders of both Company are also likely to benefit from the increased value created through business synergies, cost savings, reduction in

administrative / operating costs and improved financial performance of the merged entity.

(d) Simplification of Group structure:

The Proposed Amalgamation would lead to simplification of the Group structure by reducing one listed company, and thereby eliminating inefficiency and cash trap on distribution of profits to shareholders in future. This will also lead to reduction of higher compliance/ reporting burden and administrative cost by reduction of one listed company. All of this will result in higher operational efficiencies and maximize value for the shareholders of both the companies.

(e) Focused management, synergies, and Growth prospects:

The Proposed Amalgamation would not only create economies of scale but also simplify management and strategic focus, leading to a better long-term performance. The Amalgamation will facilitate better and more efficient control over the business and financial conduct of the merged company allowing a more streamlined and coordinated approach to governance and strategic decision-making. The combined entity, on the back of its financial stability is likely to attract more opportunities for organic and inorganic growth viz., partnerships, acquisitions, and market expansion, translating into enhanced financial prospects.

In summary, the amalgamation of the Transferor Company with the Transferee Company is driven by strategic business objectives of preserving businesses of both companies, build strong foundation and achieve market competitiveness by combing the collective strength of both the companies, achieving business and operational synergies & efficiencies, improved financial stability and performance, and thereby preserving and creating long-term value for its various stakeholders.

This comprehensive rationale as above underscores the strategic motivations, expected benefits, and the context surrounding the Proposed Amalgamation, highlighting its alignment with both the companies' objectives and the interests of their various stakeholders.

(f) Due to the aforesaid reasons, it is considered desirable and expedient to amalgamate the Transferor Company with Transferee Company in accordance with this Scheme, pursuant to Section 230~ 232 of the Companies Act, 2013

ANALYSIS AND FINDINGS

5. Since this Application is for seeking order for dispensation/ convening of the meetings of Equity Shareholders, Preference Shareholders, Secured Creditors and Unsecured Creditors of the Applicant Companies, the analysis has been restricted to that and other issues including pending litigation against the Transferor Company would be analysed at the time of the Second Motion Company Petition of the Applicant Companies.

6. During the course of hearing held on 25.10.2024, it was observed that the liability side of the Balance Sheet is not matching with the figures shown in the list of Creditors upon which, it was stated that the notice may be given to all the Creditors, person/ entity having liability on the Companies either on the basis of Provisional Balance Sheet filed with the petition or on the basis of Provisional Balance Sheet duly certified by the Chartered Accountant as on the date of the order.

7. On further examination of the Provisional Balance Sheet as on 30.06.2024 filed by the Applicant Companies, it was noted that the amount of the Secured Creditors as on 30.06.2024 as per the list matched with the Secured Creditors as per the Provisional Balance Sheet as on 30.06.2024 as shown in the Table below:

In view of the above, we do not consider it appropriate to issue notice to the Secured Creditors and convene the meeting thereof and are inclined to consider the request of the Applicant Companies to dispense with the meetings of the Secured Creditors. However, we consider it appropriate that the notice of the meetings to be convened of the Unsecured Creditors of the Applicant Companies may be given to all the person/ entity having liability on the respective Applicant Companies, except Secured Creditors on the basis of Provisional Balance Sheet as on 30.06.2024.

8. It is also noted that as per the Provisional Balance Sheet as on 30.06.2024 of the Transferor Company, the other payable are Rs.4104.24 lakh, which include the statutory dues also. It is also noted that Independent Auditors' Report on the Standalone Financial Statements of the Transferor Company for the year ended 31.03.2024 has also pointed that there are some undisputed statutory dues outstanding for a period more than six months from the date they became payable as at the year end, which are Provident Fund Rs.107.90 lakhs, Employees State Insurance for Rs.22.74 lakhs, Estate Duty Rs.43.0 lakhs. - b) Emphasis is drawn upon Note No. 11.1 of the accompanying standalone financial statements, where M/s Ind-Swift Laboratories Limited (ISLL) (related party) has entered into an agreement with M/s Ind-Swift Limited (ISL) on 30-03-2024 for the revival of ISL and offered to become Resolution Sponsor of the company. ISLL has taken over the loan assigned by various banks to EARC by settling the total debts payable by ISL at Rs. 352.60 Crore. The loan of Rs. 815.77 Crore has been taken over by ISLL from ISL and the same is payable by ISL under the agreed terms as Rs. 352.60 Crore as sustainable debt repayable in 9 years (including 15 months moratorium) at the rate of 10% p.a. and balance Rs. 463.17 Crore as unsustainable debt in the form of Zero Coupon Bond (ZCB) to be waived off in case of successful payment of sustainable debt.

Legal suits have been filed for the withdrawal of the same and the matter is subjudice.

It is noted that some of the above observations appears to have the significant bearing, and would be required to be examined at the time of Second Motion Company Petition.

13. It is noted that Independent Auditors' Report on the Standalone Financial Statements of the Transferee Company for the year ended 31.03.2024 contain Emphasis of Matters and other observations as below:

Emphasis of Matters

Without qualifying our opinion, we draw attention to the following matters in the Notes to the financial statements:

- a) Emphasis is drawn upon Note No. XXXI of the accompanying standalone financial statements, the company has entered into Business transfer agreement with M/s Synthimed Labs Private Limited (SLPL) under the scheme of slump sale for a consideration of Rs. 1650 Crore and accordingly transferred all the assets and liabilities to SLPL as per scheme of transfer as on 18th March 2024.
- b) Emphasis is drawn upon Note No. V of the accompanying standalone financial statements, M/s Ind-Swift Laboratories Limited (ISLL) has acquired a loan for Rs. 352.60 crores from Edelweiss, a lender, in relation to the loan provided to Indswift Ltd along with all other rights and unsustainable debt of Rs. 463.17 in terms of the Loan Agreement with Ind-Swift dated 30.03.2024. The unsustainable part/zero coupon debt is payable fully in case of default in repayment of the term loan facility and to be waived off on the successful repayment of the term loan facility.

Under the principles of Ind AS 37, "Provisions, Contingent Liabilities and Contingent Assets," the additional rights to recover unsustainable debt is recognized as a contingent asset. This is based on the possibility of future economic benefits that may arise if certain conditions are met. As such, the unsustainable debt, which is a zero coupon debt; which will be waived off on timely repayment of the loan facility, is disclosed as a contingent asset in the balance sheet.

"Our opinion is not modified in respect of the above matters".

SECTION III - METHODS OF VALUATION ADOPTED

In case of a valuation for Amalgamation, the emphasis is on arriving at the “relative” values of the shares of the merging companies to facilitate determination of the “share exchange ratio”. Hence, the purpose is not to arrive at absolute values of the shares of the companies.

Judicial Pronouncements: -

Hindustan lever Employees’ Union v/s Hindustan lever Limited and others (1995) 83 Company cases 30 (SC)

The jurisdiction of the Court in sanctioning a claim of merger is not to ascertain mathematical accuracy if the determination satisfied the arithmetical test. A company court does not exercise appellate jurisdiction. It exercises a jurisdiction founded on fairness. It is not required to interfere only because the figure arrived at by the valuer was not as good as it would have been if another method had been adopted. What is imperative is that such a determination should not have been contrary to law and that it was not unfair for the shareholders of the company which was being merged.

The Hon’ble Supreme Court held “We do not think that the internal management, business activity or institutional operation of public bodies can be subjected to inspection by the court. To do so, is incompetent and improper and, therefore, out of bounds.”

The **dominance of profits for valuation of share was emphasized in “McCathies case”** (Taxation, 69 CLR 1) where it was said that *“the real value of shares in a company will depend more on the profits which the company has been making and should be capable of making, having regard to the nature of its business, than upon the amount which the shares would realize on liquidation”*. This was also re-iterated by the Indian Courts in Commissioner of Wealth Tax v. **Mahadeo Jalan’s case (S.C.)** (86 ITR 621) and Additional Commissioner of Gift Tax v. Kusumben D. Mahadevia (S.C.) (122 ITR 38).

In the ultimate analysis, valuation will have to involve the exercise of judicious discretion and judgment considering all the relevant factors. There will always be several factors, e.g., present, and prospective competition, yield on comparable securities, and market sentiments etc. which are not evident from the face of the balance sheets, but which will strongly influence the worth of a share.

Based on the facts of the case, I have valued **Ind Swift Limited (Transferor Company/ “ISL”)** and **Ind Swift Laboratories Limited (“Transferee Company”/ “ISLL”)** as per Internationally Accepted Valuation Methodologies.

SECTION – IV VALUATION ANALYSIS

There are three approaches to Valuation namely Income, Asset, and Market Approaches.

Approach	Valuation Methodologies	Basis of Consideration
Asset	Adjusted Net Asset Value (NAV) Method	<p>The Asset-based method views the business as a set of assets and liabilities that are used as building blocks of a business value. The difference in the value of these assets and liabilities on a Book Value basis or Realizable Value basis or Replacement Cost basis is the business value.</p> <p>In the case of the transferee Company, I have deemed it suitable to apply NAV as the Company has a huge quantum of Investment in assets and this method involves identifying and valuing a company's assets which is quite objective and reliable as the company has stable and predictable asset values.</p> <p>However, in the case of the Transferor Company, there are no significant investments in assets made by the Company along the Book Value of the Company is negative, hence, I deemed it suitable to avoid the Adjusted Net Asset Value (NAV) Method.</p>
Market	Comparable Companies Multiples (CCM) Method	<p>This methodology uses the valuation ratio of a publicly traded company and applies that ratio to the company being valued. The valuation ratio typically expresses the valuation as a function of a measure of financial performance or Book Value (e.g., Revenue, EBITDA, EBIT, Earnings per Share or Book Value). A key benefit of Comparable Company Market Multiple analysis is that the methodology is based on the current market stock price. The current stock price is generally viewed as one of the best valuation metrics because it is based on observable inputs.</p> <p>In the instant case, both companies are listed on the Stock Exchange and are frequently traded in the National Stock Exchange (NSE). Hence, I deemed it suitable to consider the Market Price in the NSE for the valuation exercise instead of the Comparable Multiples of the Transferor and Transferee Companies.</p>
	Market Price Method (90 Trading Days (TD) –10 Trading Days (TD))	<p>In this method, the VWAP (Volume Weighted Average Price) of the latest 90 Trading days (TD) VWAP and 10 Trading days are taken. The maximum of these two is then taken as the fair market value.</p> <p>Since both Companies are listed on the Stock Exchanges and are frequently traded on the NSE, I have applied this methodology in this instant case for Transferor and Transferee Companies.</p>
Income	Discounted Free Cash Flow (DFCF) Method	<p>The DFCF method expresses the present value of the business as a function of its future cash earnings capacity. This methodology works on the premise that the value of a business is measured in terms of future cash flow streams, discounted to the present time at an appropriate discount rate. The value of the firm is arrived at by estimating the Free Cash Flows (FCF) to the Firm and discounting the same with the Weighted Average cost of capital (WACC). The DFCF methodology is the most appropriate basis for determining the earning capability of a business. In the DFCF approach, the appraiser estimates the cash flows of any business after all operating expenses, taxes, and necessary investments in working capital and Capex are met.</p> <p>In the case of Transferee Company, I have deemed it suitable to avoid the DFCF Method as the Company has a huge quantum of Investment assets and this method involves valuing a company based on the future cash flows. However, the future cash flows from Investment Assets might not be accurate and reliable when computing the Company's worth.</p> <p>In the case of the Transferor Company, having a business that is expected to be continued in future years along with minimal Investment assets, hence I deemed it suitable to do a valuation of the Company as per the Discounted Free Cash Flow (DFCF) Method.</p>

Note:

For the purpose of valuation of equity in this transaction through DFCF methodology, I have relied upon the projections provided by the management for the period starting from 01st July 2023 and ending 31st March 2031 duly supplemented by its Terminal Value based on the Gordon Growth Model and extrapolating the adjusted free cash flows for last year at an annual growth rate of 4% to perpetuity.

DFCF Assumptions:

Particulars	Notes	
Risk free rate (Rf) as on 30.06.2023	7.11%	Considered of long-term India government bond rate
Market rate of return - ER(m)	15.18%	Considered the BSE Sensex for the determination of the Market Return.
Company Beta... (β)	0.30	I have taken the Beta value (B) as 0.30 since the Company's shares are listed, hence, I have taken the company's data to arrive to the beta.
Additional Company Specific (Including Small Company)	2.50%	I have given 2.50% additional risk premium on account of Business risk.
Risk Premium		
(Unsystematic risk) (CSRP)		
Cost of Equity (Ke)	12.06%	As per Modified CAPM model i.e. $[Ke = Rf + \beta(Rm - Rf) + CSRP]$

Growth Rate	4%	The perpetuity growth rate assumes that the company will continue its historic business and generate Free Cash Flows at a steady state forever. Since terminal value constitutes a major proportion of the entire value of the business, while deciding the terminal growth rate have given emphasis to economic factors & financial factors like Inflation of the Country, GDP growth of the Country, Projected Financials, Historical Financial Position, Organic & Inorganic growth strategies of the Company, etc. Accordingly, for perpetuity, I have considered 4% growth rate

Hence, I deemed it suitable to consider 100% weightage to the Market Price Method.
